

RIVO 1

ACCURATE RAINFALL DATA

FarmX offers a rain gauge to connect rainfall data to the FarmX agronomic farm management platform via the FarmX telemetry device. This combination provides users with a cost effective solution for increasing data connectivity and generating agronomic insights. Knowing the exact rainfall helps you make data-based decisions at the field level.

Features:

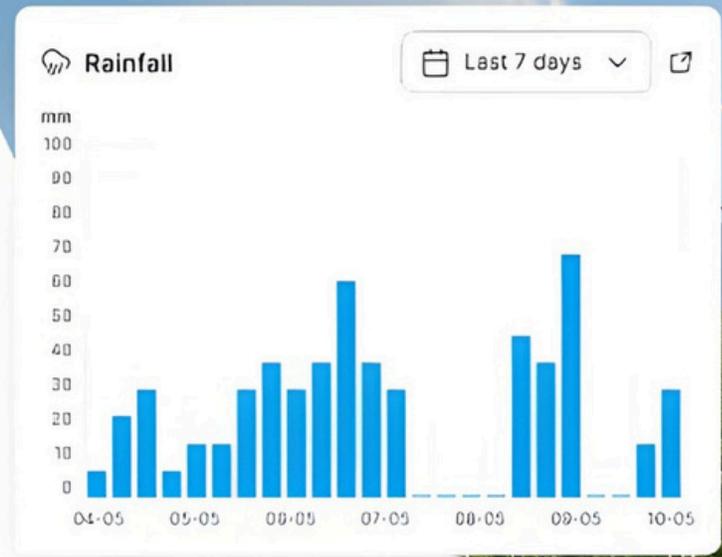

-  Accurately measures rainfall amounts
-  Hyper local weather data
-  Easy installation and connection to the FarmX platform
-  Fully integrated with the FarmX agronomic farm management platform
-  Detailed charts, data and analytics at your fingertips through FarmX

RG1 specifications

- Tipping spoon rain gauge with self-emptying bucket
- Dimensions: 6.5 × 10 inches
- Weight: 13.4 ounces
- Accurate to +/- 2%
- Includes: rain cone and bird spikes

Increased Data and Improved Accuracy

Connecting the rain gauge via the FarmX telemetry device allows users to add more data points to the FarmX platform for increased data connectivity and more accurate agronomic advice and insights.

FarmX Telemetry

Features

- Season-long battery life
- Sleek design with tool-free installation
- Easy device activation
- Ability to connect a broad range of sensors
- Optional solar panel
- Includes: 2 meter cable with open end wires

Connections

Each FarmX telemetry devices has 2 SDI-12+ 2 Pulse counter+ current loop (communication protocol) to connect the following devices:

- Soil sensors – Sentek, Terrasen, Aquacheck
- Rain gauge – FarmX Davis
- Flow meter
- Effluent pond level meter
- Pump switch
